use

The future is NOW

E-Learning

LMS RFP Template

Meets today's e-learning needs

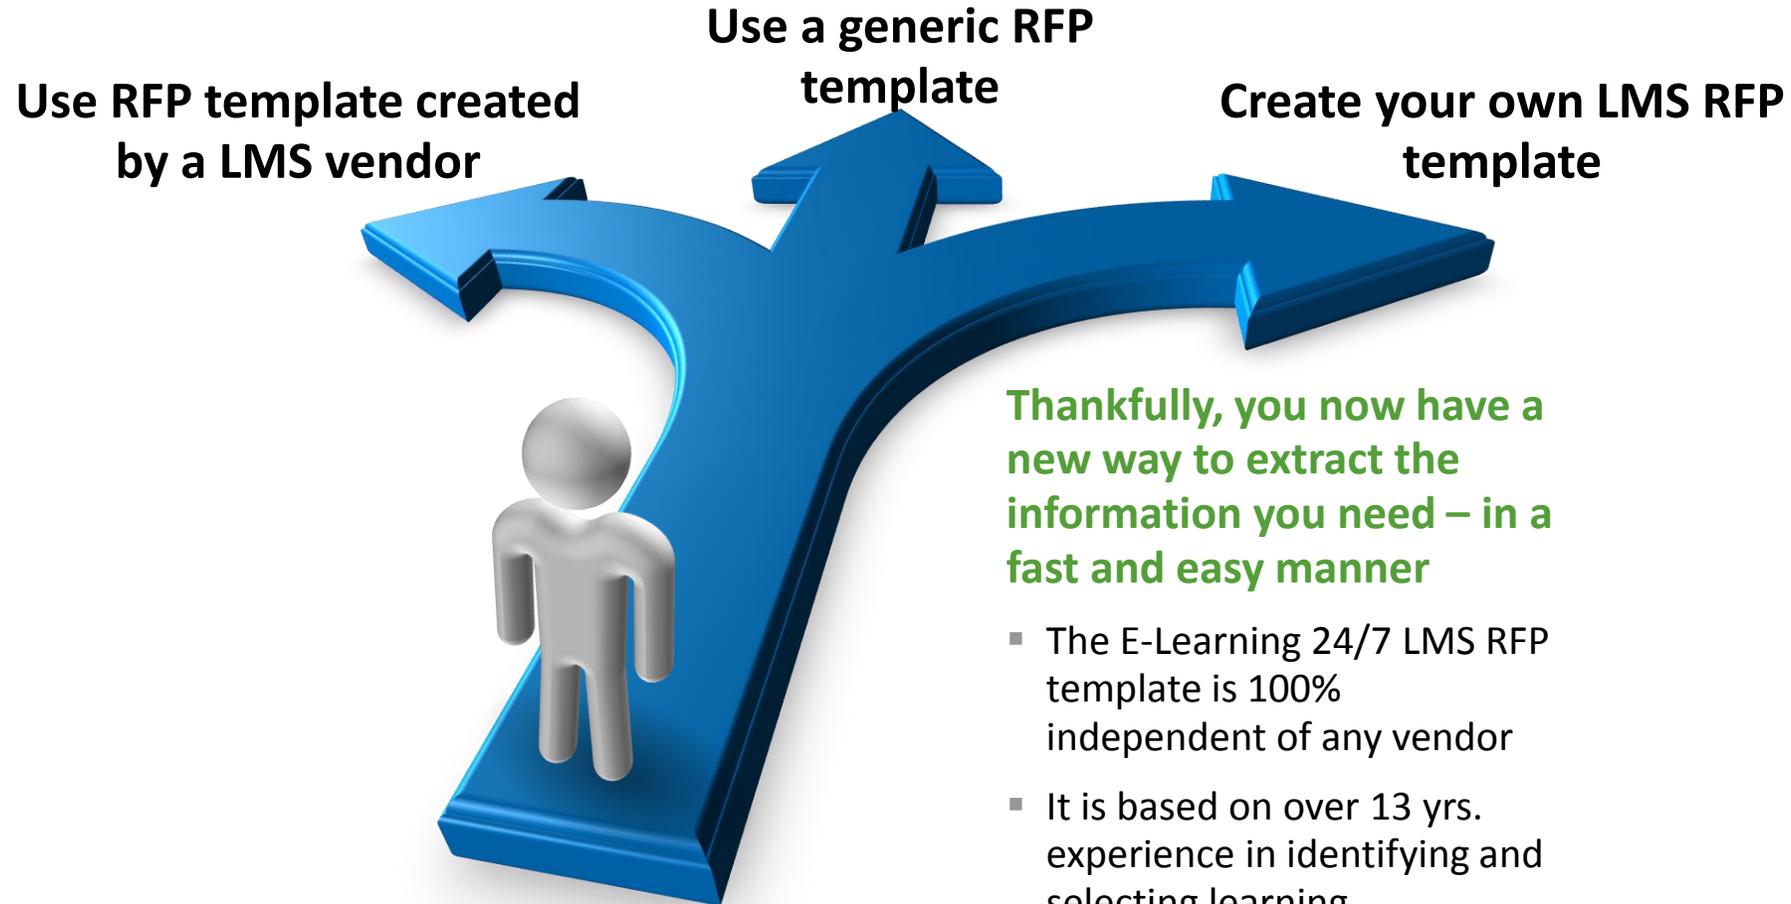

The E-Learning 24/7 LMS RFP Template

Benefits, Objectives and Approach

By Craig Weiss, CEO, Analyst and Blogger of E-Learning 24/7

Selecting a LMS

In the past there were few options to use when sending out a RFP

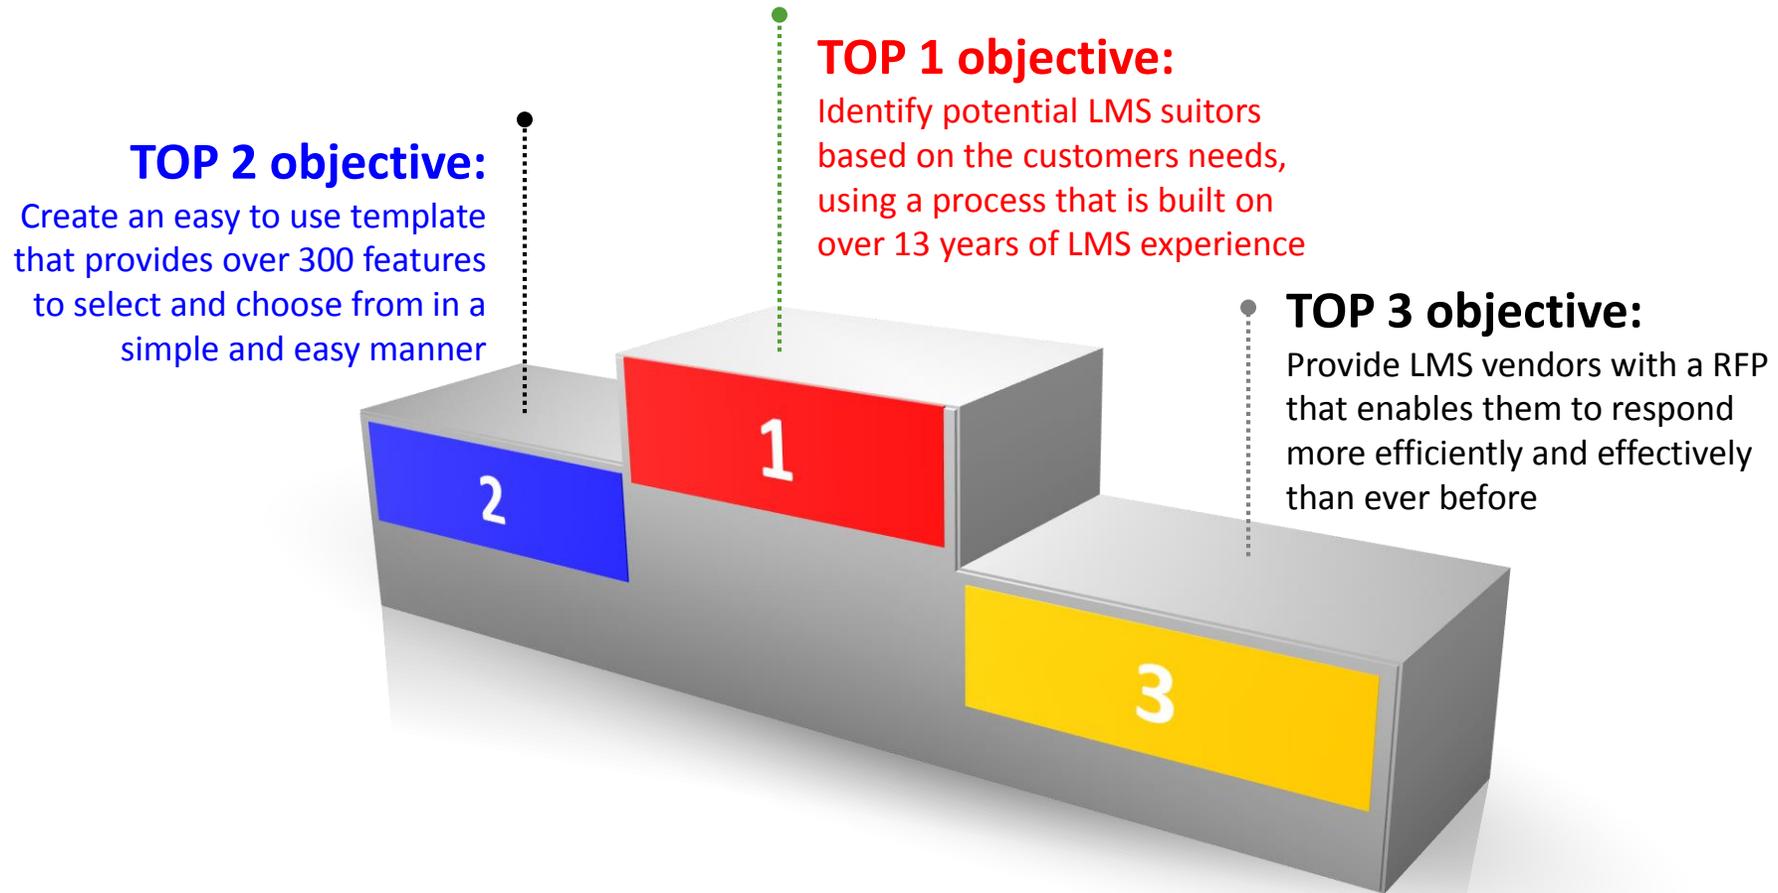

Thankfully, you now have a new way to extract the information you need – in a fast and easy manner

- The E-Learning 24/7 LMS RFP template is 100% independent of any vendor
- It is based on over 13 yrs. experience in identifying and selecting learning management systems

LMS RFP Template Objectives

Speed, efficiency and agility are essential in today's world. The E-Learning 24/7 LMS RFP template is built upon those ideas.

Benefits of using the E-Learning 24/7 LMS RFP Template

Streamline the Process

- Built for today's LMS market
- Creates an agile approach that works

Powerful Capabilities

- Over 300 LMS features divided by categories, you simply select the ones you want or need
- Pricing and itemizer built into the template

Ease of Use

- Anyone can use this template regardless if you are a novice or expert
- Simple and fast to complete and turn over to the prospective LMS vendor(s)

Questions & Answers

Q. Why was this LMS RFP Template created?

I created this LMS RFP template because I was tired of seeing other LMS RFP templates out there on the internet that were outdated and/no longer applied to today's LMS space. I believed that if a LMS RFP template could be created, it should enable anyone to use it, regardless of they are novice or an expert in LMS identification and selection.

Q. How is your LMS RFP template different than all the others out there?

I built this template based on over 13 years experience in identifying and selecting learning management systems across numerous sectors including non-profit, education, corporate and association. I also factored in my current roles which includes tracking 570 LMSs around the world and monitoring what is going on in the industry.

As a result, this template offers an ease of use, simplicity and feature options that are not found in other templates of similar nature.

The feature section is going to become your favorite area and here's why:

Not only are the most common features listed, but ones that over my years I have found that people either select or consider selecting for their LMS. The template also lists the newest features in the industry that some systems are now offering.

Questions & Answers

Q. With the feature capability you mention, how easy will it be for my prospective vendor to complete?

Super easy and simple. What makes this LMS RFP template so efficient is that it also enables your LMS prospective vendors to create an agile process to respond accordingly with information specifically for you in a time sensitive manner.

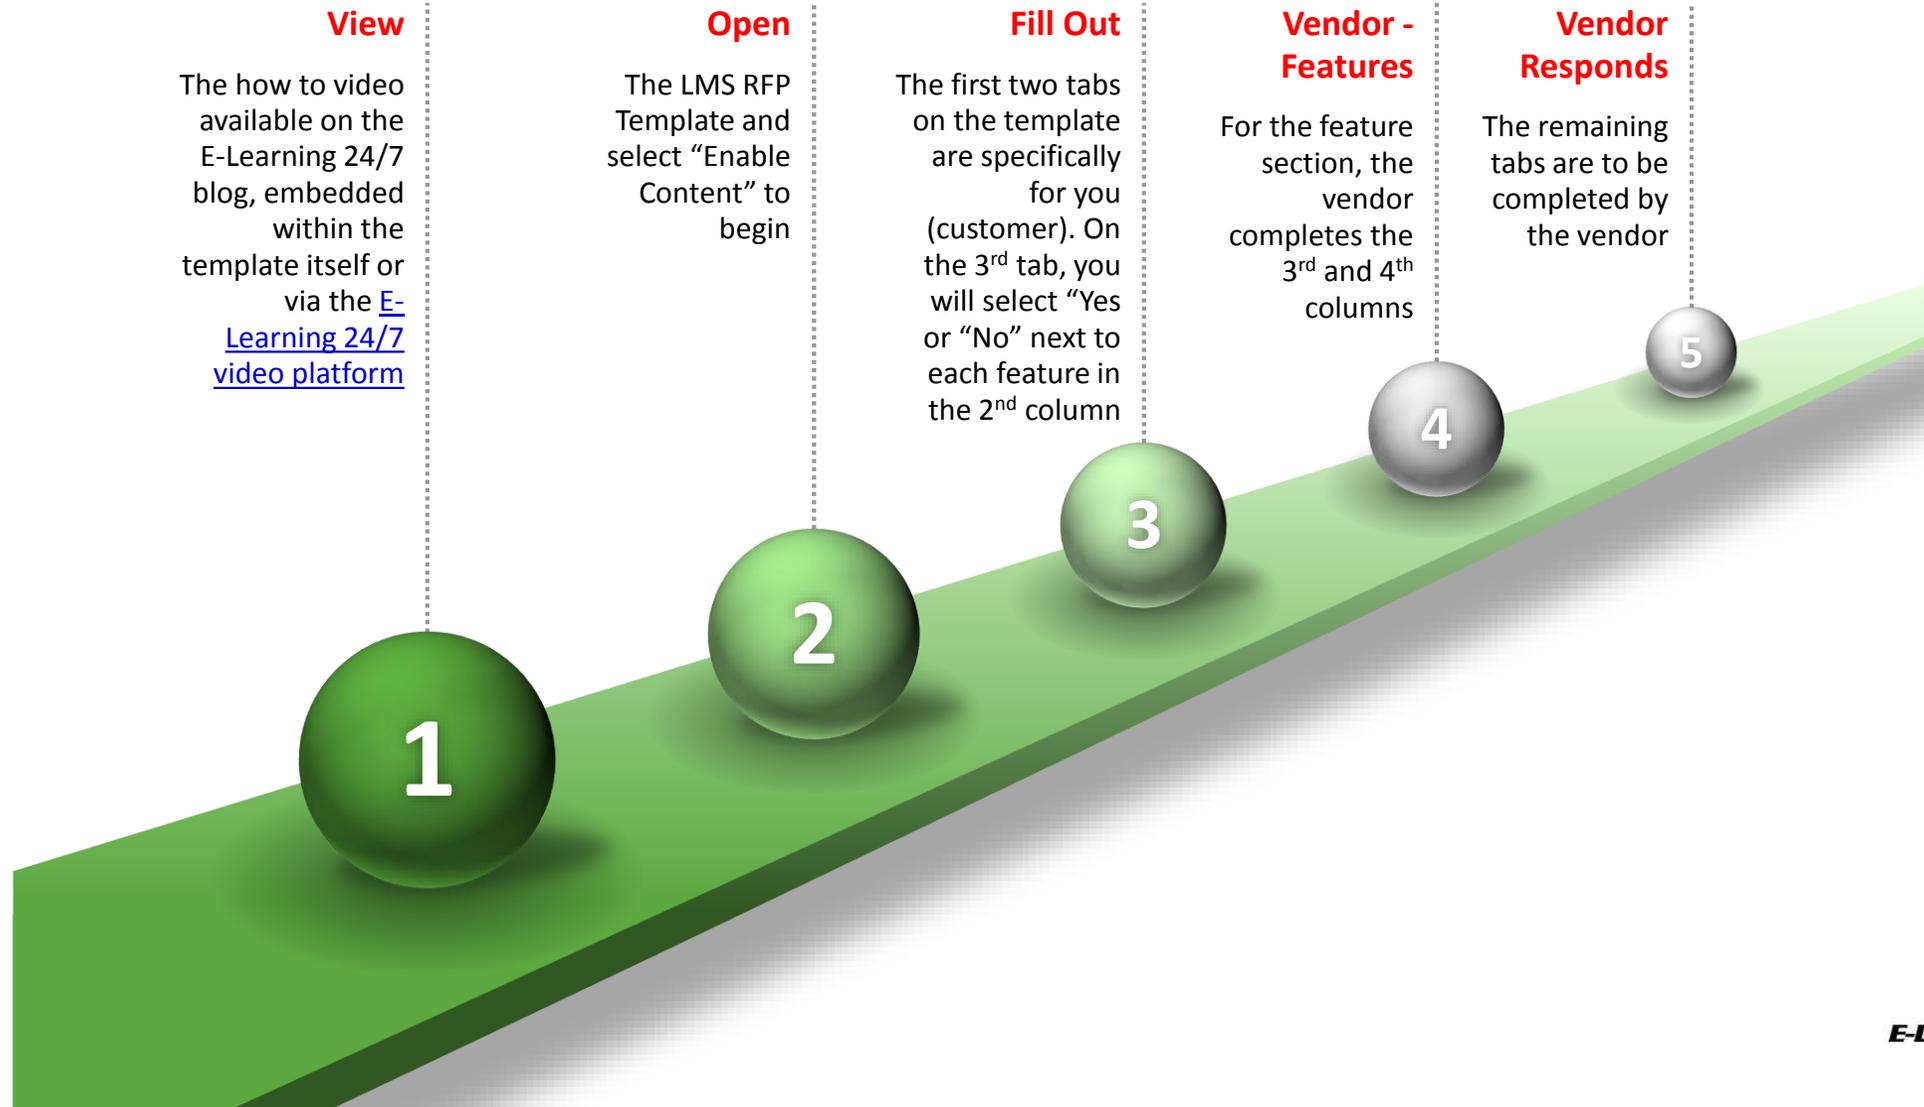

There are tabs specifically identified for the vendor to select and enter in their information. These tabs include:

- *Vendor background – who are they, how long have they been in business, etc.*
- *LMS product - what is the latest release, what is the road map for the rest of the year, etc.*
- *Pricing calculator – including a detailed itemized list – plus the vendor can add additional comments*
- *Customer references provided to you by the LMS vendor*

With the Feature section, the customer (YOU) completes the first column, by simply “yes” or “no”. The vendor then completes the 2nd column, by selecting either “yes” or “no”. The third column enables the vendor to add additional comments if they so choose to do so.

LMS RFP Template Steps

The LMS RFP Template is Simple and Easy to Use

LMS RFP Template Summary

LMS RFP Template

- Created by Craig Weiss, CEO, Analyst and Blogger of E-Learning 24/7
